

2B-Inventory

The Ultimate in Mobile Inventory, Store & Warehouse Management for Counterpoint SQL
Powerful. Simple. Portable. Guaranteed.

Manage Inventory from Anywhere

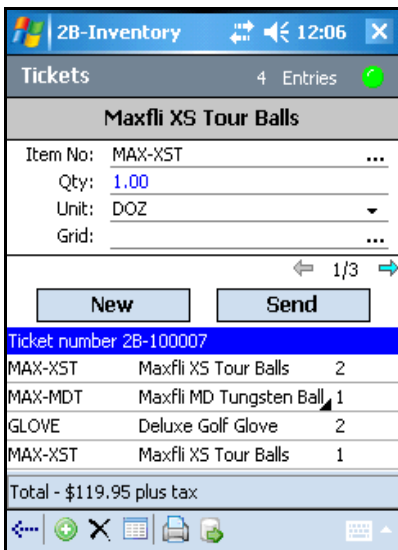

2B-Inventory is designed for retailers and warehouses of all sizes who want the flexibility of using a rugged hand-held mobile device with barcode scanner to manage inventory and store information. Manage store and inventory information from one easy to use mobile application.

2B-Inventory works in real time when connected to a wireless network or cellular data plan. A wireless connection is not required as 2B-Inventory works automatically in batch mode if there is no network or if the connection is lost.

SAVE TIME, *improve* ACCURACY

- 2B-Inventory provides anytime, anywhere access to inventory and customer details allowing you to be productive no matter where you are.
- *Auto Save* – All items and quantities entered are automatically saved as soon as they are scanned.
- Lookup item pricing and quantities on hand for your customers without going back to the register.
- Scan inventory at all store locations and warehouses.
- Full Keyboard Navigation with Device Direction pads
- Easy to use interface allows one click transfer within each module.
- With 2B-Inventory you can improve the speed and accuracy of many everyday tasks as well as provide greater customer service.

2B-Inventory

The Ultimate in Mobile Inventory, Store & Warehouse Management for Counterpoint SQL

Item Manager

Quick and easy access to item information – even check quantities at other locations! View items details such as current stock quantity, price, margin, SKU, description, department, category, bin and last sale date. Item edit and real-time lookup included.

Physical Inventory

Save time, improve accuracy and ease the burden of physical inventory. Scan the barcode of inventory items to record actual store quantities. Quickly transfer scanned information from 2B-Inventory to Counterpoint to calculate differences in recorded and actual inventory.

Receiving/Transfer In

Increase efficiency of receiving merchandise. Scan items (or manually enter item code for items with no barcode) and enter quantities received (including serialized inventory). Included are multiple options for receiving inventory: auto-PO reconciliation, choose a PO or choose a supplier.

Transfers

Simplify the task of issuing and requesting transfers in multi-location environments. Simply choose to and from location and add items by scanning a barcode, entering an item number manually, or searching for an item. ****NEW**** Create quick transfers and transfer requests

Mobile Tickets/Orders

Create tickets on the go or for line busting! Enter customer, items, and quantities. Use the one click transfer to update your point of sale database with the customer and ticket information. Recall ticket or order from the point of sale to complete the transaction. If customer is selected, price rules will automatically apply!

Purchase Requests

****NEW**** Make smarter buying decisions. With 2B-Inventory, you have the choice of creating a purchase request based on the supplier you choose or let 2B-Inventory create the purchase request(s) based on the items primary vendor. Choose your preference and begin scanning items...2B-Inventory will do the rest! Simplified purchasing!

Opticon H19A

WHAT ELSE MAKES 2B-INVENTORY UNIQUE?

- **Tickets & Orders follow price rules and specials**
- Mobile application with local database - connect via a cradled or wireless connection
- Take inventory and customer information anywhere
- Print labels and receipts
- Support for gridded items
- Check stock from other store locations!
